

Communication Septembre 2012 - NEW PRODUCTS

Dear Sylvac partner,

You will find hereunder **IMPORTANT information** about our coming new products. It will give you many good reasons to go and visit your customers this autumn....

Digital Indicator S229

S_Dial WORK

Manufactured and marketed with an incredible success for several years, we remind you that our **S229 dial gauges** will be **discontinued in the end of this year**.
Last order : week 51/2012 (21st December 2012)

20 years of experience
+ New technology
+ Great Pricing
= FUTURE SUCCESS

IT'S NOW TIME FOR YOU TO INVEST IN OUR NEW PRODUCTS !

Start promoting our new **S_Dial WORK BASIC** and **S_Dial WORK ADVANCED**. These both new models are available in 12.5 and 25mm range.

S_Dial WORK BASIC long range (50 / 100 / 150mm) will be available as per January 2013

Our new **S_Dial WORK** offer many advantages as per :

- Reinforced construction
- Integrated lifter (links or right)
- **Better accuracy** thanks to our constant research on the measuring system
- **Lower prices** on the BASIC
- New technology with configurable menus ("**Make your own gauge**")
- Additional **programmable central key**
- Broad choice of functions (min-max-delta / Tol / Mult Factor / Preset / Auto OFF etc.)

Note :

Any problems with this link, just type "Sylconnect" in Youtube

How it works

1. The customer downloads the Sylconnect installation package from our web site http://www.sylvac.ch/index.php?option=com_docman&task=cat_view&gid=124&Itemid=55&lang=fr
2. When starting SylConnect for the first time, the user has to complete the required information (including the Agent name), to get a license. If the user chooses to register later, a 30 days free trial license is being activated.

3. When the user finally completes the required information, a registration key is created and an e-mail is automatically generated to Sylvac.
4. The mentioned Agent is informed per e-mail of the customer requesting a license key.
5. The license key is issued as soon as we get the agreement from the agent.
6. We send the license key to the customer by email, with copy to the agent.
7. The license key is invoiced to the agent. If the agent wants to take advantage of quantity discounts, he can place order for 3 or 5 licenses, we will count the licenses issued and deduct from his licenses available balance.

This procedure could change in a near future. Instructions will be updated on our web site.

Important: a detailed operating manual is available for Sylconnect V1.0. Please read carefully the information on the installation, minimum system requirement and Windows tuning for Sylconnect operation.

NOW AVAILABLE

An extended range of standard Mikes, up to 161mm
